

Stop building before you test.

Most side hustle ideas do not fail because people are lazy. They fail because nobody tested demand early enough.

This workbook gives you a simple 30-day system for finding real problems, asking real people, making tiny offers, and deciding whether to stop, pivot, or continue.

Inside:

- The 10-Message Test
- The \$10 Tiny Offer Test
- The Polite Interest Trap
- The 3-Signal Scorecard
- 30 days of direct action pages

No guru hype. No income guarantees. Just small tests, real signals, and clearer next steps.

THE SIGNAL TEST METHOD

Stop Building Ideas Nobody Wants

The Signal Test Method: A 30-Day Side Hustle Workbook to Test Demand Before You Build

A 30-day workbook to test demand before you waste time building.
